

## Oven thermometer DTSP

# DTSP

### Intended use

Bi-metallic thermometer DTSP is intended for mounting into the oven glass in stoves.

### Description

The measuring bi-metallic system shaped as Archimedes spiral is fitted in the thermometer case and mounted in the middle of the oven door glass with printed scale. The heat causes the spiral in the measuring system to wind or unwind. The pointer fixed to the spiral indicates the temperature in the oven.

### Customizable parameters:

- type and dimensions of the glass,
- position of the thermometer in the glass,
- colours of the casing.

### Mounting

Mounting of the glass into the oven door is done by the producer of the stove.

### Technical specification

Measuring range	0 - 300°C
Resolution of the scale	10°C
Accuracy	± 2,5 % from the measuring range
Approx. weight	1315 g
Dimensions	please see the dimension drawing
