

# DIT 40.2

**Description**

DIT 40.2 is a thermometer design to measure temperature inside a double-glass oven. Thermometer is installed in the bottom frame of the oven door. Thermometer body is made of stainless steel, firmly connected to the scale, pin and bimetallic measuring system. Thermometer can only be placed in an environment where no invasive substances are present. The measured value must not exceed the maximum scale range.

**Technical Data**

Measuring range	+ 50 and up to + 250 °C
Resolution of the scale	50°C
Accuracy	± 5 % from the measuring range
Approx. Weight	12 g
