

# OVEN THERMOMETER DTSP

## DESCRIPTION

The measuring bimetallic system shaped as Archimedes spiral is fitted on the thermometer case and mounted in the middle of the oven door glass with printed scale. The heat causes the spiral in the measuring system to wind or unwind. The pointer fixed to the spiral indicates temperature in the oven.

### Customizable parameters:

- Type and dimensions of the glass
- Position of the thermometer in the glass
- Colours of the casing

## USAGE

Bimetallic thermometer DTSP is intended for mounting into the oven glass in stoves.

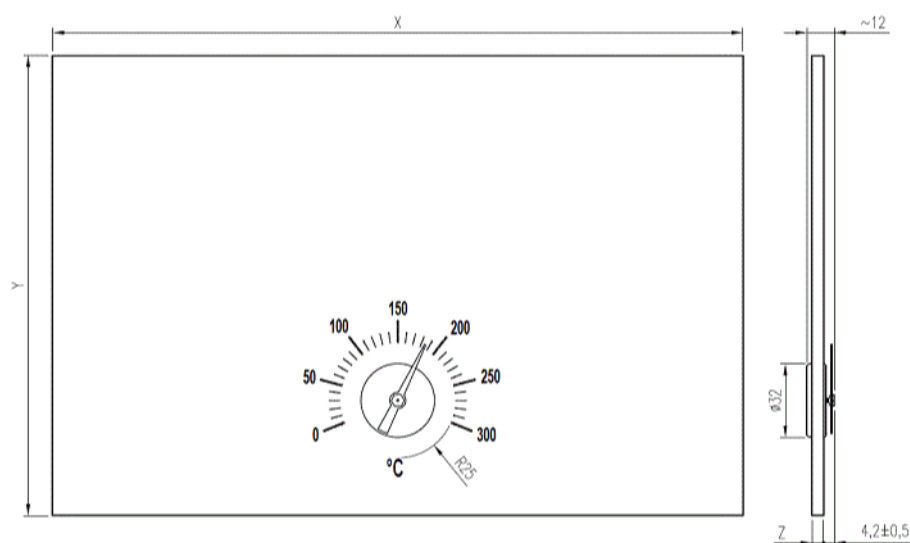

## MOUNTING

Mounting of the glass into the oven door is done by the producer of the stove.

## TECHNICAL DATA

|                         |                                |
|-------------------------|--------------------------------|
| Measuring range         | 0 to +300°C                    |
| Resolution of the scale | 10°C                           |
| Accuracy                | ±2,5% from the measuring range |
| Approx. weight          | 1315 g                         |
| Dimensions              | According to drawings          |
