

Vane-wheel single-jet dry water meter

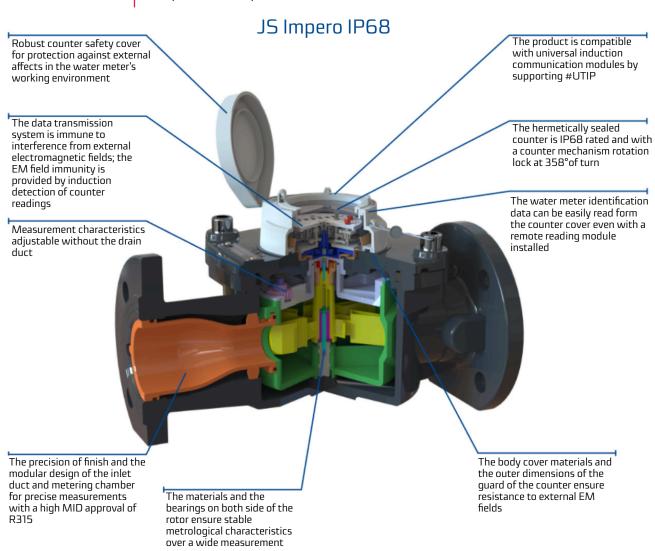

## JS IMPERO IP68/IP65 (DN50-100)

#### **DESCRIPTION**

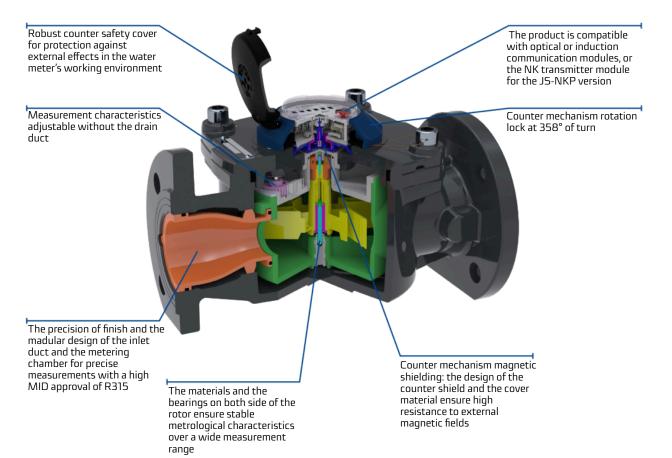

JS Impero is a single-jet vane-wheel dry water meter for precise measurement of large water supply consumption. The advanced design engineering ensures a high dynamic response to metering conditions and a high resistance to strong magnetic fields. The water meter is compatible with clip-on communication modules for automatic wired or wireless meter reading. The water meter is designed and manufactured to the MID (Measuring Instruments Directive) and in compliance with EN 14154, OIML R49 and ISO 4064 for the measurement range of R315.

Cold water supply systems (max. 30°C) and hot water supply systems (max. 50°C) in multifamily housing, industrial facilities, public facilities, and metering stations. The maximum admissible pressure (MAP) is 16 bar. Install the water meter horizontally with the counter upright (H $\uparrow$ ). The rotating counter of the water meter facilitates manual readout directly from the dial. The water meters designed to IP68 are excellent for operation in difficult ambient conditions, and the standard version is compatible with universal induction communication modules which feature #UTIP (Universal TI Plug). The IP65 water meters are compatible with optical and induction communication modules.

### JS Impero IP65

#### **ADVANTAGES**

- Precise measurements at R315 H↑
- Low starting flow
- Does not require upstream and downstream straight pipework runs
- May replace compund water meters (restrictions apply)
- Protected by design against:
  - Strong magnetic field interference per EN 14154
  - Mechanical tempering (with a robust, tamper-proof counter and cover design)
  - Multiple rotations of the counter by more than 358°
- The standard water meter version is AMR (automatic meter reading) (MDMS) capable, while the IP 68 version is provided with #UITP for compatibility with induction communication modules
- Easy reading of indications and parameters by:
  - Any orientation of the counter mechanism within 0 to 358° in the IP68 NKOP/NK version, the standard IP65 version, and the JS-NKOP version adapted for he NO and NK transmitter modules
  - Hermetically sealed, non-fogging counter in the IP68 version
  - Location of water meter parameter legend on the top surface of the counter cover in the IP68 version
- Remote wireless indication reading with a portable terminal or a stationary reading systems
- Wireless-system based indication reading with:
  - Induction communication modules (TI): IN-WMBUS, IN-GSM for IP68 and IP65
  - Optical communication module (IR): APT-03A-4 for IP65
- · Wired system based indication reading with:
  - Induction communication modules (TI): IN-PULSE for IP68 and IP65
  - Optical communication modules (IR): APT-MBUS-NA-4 and AT-MBUS-NE-01 for IP65
  - NK and/or NO reed relay pulse transmitter for IP65
- Alarm output capability: the meter with a universal induction communication module is capable of remote indication of any removal of or damage to the module, disruption of operation, reverse flows, leakages, and more
- Long operating life

#### **KEY FEATURES**

- MID-compliant EC type examination certificate
- IP68 rating: the meter is capable of operation in extremely difficult ambient conditions (and also when fully immersed in water), also with a data communication module installed
- Highly aesthetic droplet-shaped design for the counter safety cover and guard
- Stable flow rate inlet bore design
- Double-sided rotor bearings
- Removable measuring insert
- Potable water approved materials
- Duct-parallel rotor axis
- Magnetic coupling

# REGULATORY AND STANDARD COMPLIANCE

- Directive 2014/32/EC of the European Parliament and of the Council of 26 February 2014 on the harmonisation of the laws of the Member States relating to the making available on the market of measuring instruments
- Polish Act of 13/04/2016 on market surveillance and compliance assessment systems
- OIML R 49-1 rev. 2013(E): Water meters for cold potable water and how water. Part1: Metrological and technical requirements
- EN 14154-1:2005+A2:2011 Water meters. Part 1: General requirements
- EN 14154-2:2005+A2:2011 Water meters. Part 2: Installation oand conditions of use
- EN 14154-3:2005+A2:2011 Water meters. Part 3: Test methods and equipment
- EN ISO 4064-1:2014 -Water meters for cold potable water and hot water. Part 1: Metrological and technical requirements
- EN ISO 4064-5:2014 Water meters for cold potable water and hot water. Part 5: Installation requirements
- WELMEC Guidelines 11.1 Measuring instruments, Directive 2004/22/EC. Common regulations for measuring instruments (rev. 5:2014)
- WELMEC Guidelines 11.3 Guidelines for measuring instruments (rev. 1:2012)
- EU type test certificate Cold water, no. SK 15 103 MI-001
- PZH National Institute of Hygiene certificate (all materials used in JS Impero water meters habe Hygiene Certificates for use with potable water)
- Classification of environmental climate and mechanical conditions: Class B (ref. EN-ISO 4064-1:2014 (E))
- Classification of mechanical environment conditions: Class M1, as per Directive 2014/32/EC of the European Parliament and of the Council of 26 February 2014
- Classification of electromagnetic environmental conditions: Class E1, E2, as per Directive 2014/32/EC of the European Parliament and of the Council of 26 February 2014

<sup>\*</sup>Version -08 - IP68 - rated counter mechanism and cover; the water meter supports readout with induction communication modules (Ti)

\*\*IP65 version; NKOP - water meter ready for installation of reed relay and/or optoelectric pulse transfer items.

\*\*\*Connection flange bolt hole pattern: Standard: PN-EN 1092-2 (PN10), DIN 2532, DIN2501 (PN10), BS4504 (PN10) Special: PN-EN 1092-2 (PN16) (available on request)

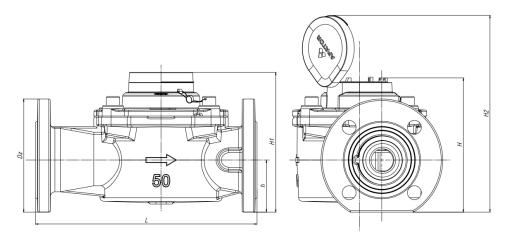

Extra: ANSI B16.5 Class 150 (DN40-300) (available on request)

<sup>\*\*\*\*</sup>DIN 19625 overall length

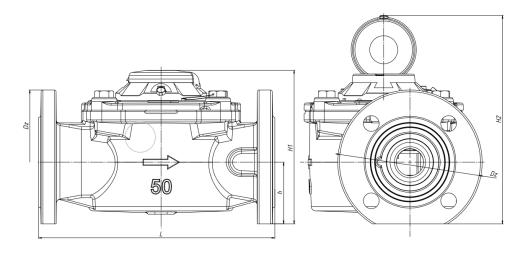

<sup>\*\*\*\*\*</sup>ISO 4064 overall length
